Natural Insulin: A Novel Intervention for Sundowning in Alzheimer's Disease

Challenge: Health

Category: Intermediate

Region: Renfrew County

City: Pembroke, ON

School:

Abstract: Sundowning is one of the most challenging symptoms seen in patients with Alzheimer's Disease. This phenomenon consists of behavioural abnormalities that can lead to caregiver burnout. This experiment was conducted to test if natural insulin from dietary sources could reduce the effects of sundowning in Alzheimer's disease. This intervention showed promising results with bringing positive changes in the effects of sundowning.
