A Memory Like a Horse

Division: Sciences physiques et des mathématiques

Catégorie: Sénior

Région: Carlton Trail

Ville: Strasbourg, SK

École: William Derby

Sommaire: This project explored horses' minds and specifically the previously unresearched subject of horses' short-term memory. Horses were tested for recognition with homemade equipment consisting of various shapes in order to see whether they could remember what an object looked like or where it was located. The results clearly showed that horses remember locations rather than objects.

Prix	Valeur
