Liam Ingram

Can We Fish Better?

Challenge: Environment

Category: Junior

Region: West Kootenay & Boundary

City: Nelson, BC

School: Trafalgar Junior Secondary

Abstract: I became interested in trying to create an environmental lure for fishing because of my love of the sport and also the lakes where I fish. The purpose of my project is to develop a lure that will attract the fish and not break down. I have spent two years working on this project trying to make an environmental lure.

Biography

My name is Liam Ingram. I am in 8th grade at Trafalgar Middle School in Nelson, BC. I have lots of different interests including hockey, soccer, baseball, basketball, hunting and of course fishing! I have some other favourite sports including snowboarding and football. As you can see, I really love being active! My project began with my love of fishing and wanting to keep our lake (Kootenay Lake) as beautiful and unpolluted as possible. Most lures that you buy are plastic and bad for the environment. I hope my lures will change how people fish. I hope in the future that my love of fishing will translate into a career as a fish biologist. We need to protect our fish habitats and I hope to make a difference. I have never been to Saskatchewan before and I am really looking forward to seeing different landscapes and lakes. It should be a great week.
