Antiperspirants and Aluminum

Division: Category:	Life Sciences Senior
Region:	United Counties
City:	Cornwall, ON
School:	Cornwall Collegiate & Vocational
Abstract:	This project studied the relationship between antiperspirant aluminum concentration and aluminum ion permeability through a semi-permanent membrane. Measurements made using colourimetric determination and spectroscopy resulted in a direct relationship being observed. It is hoped that these results will support ongoing research to discover the link between aluminum and Alzheimer's.
