Sweat Rocks

Challenge: Environment

Category: Senior

Region: Saskatchewan First Nations

City: Shell Lake, SK

School: Ahtahkakoop School

Abstract: Our project 'Sweat Rocks' is about testing different types of rocks that are used in sweat ceremonies in order to see which type of rocks hold heat the best. We chose this topic in order to gain more knowledge about our First Nations culture. We performed heat capacity experiments for different types of rocks and consulted with our community elders for guidance.

Biographies

Jordan - My name is Jordan Hunter Knife and I am 17 years old. I am in grade 12 at Ahtahkakoop school. I have a passion for sports and school. I spend my free time playing different sports and working on my math and science courses. I have a dream to become a physician. My project idea came from taking more interest into my First Nations culture.

Reacko - My name is Reacko Aron Norman Sasakamoose, I was born in Prince Albert, SK and I live in Ahtahkakoop Cree Nation. I'm 17 years old and graduating from Ahtahkakoop School. I have two school awards, from grade 8 the ELA and grade 10 Construction and Carpentry 10 awards. I also received perfect attendance numerous times. I plan on going to University for Arts & Science, preferably a language or history.
