Starr MacLean

Bridge Structures in the Northwest Territories

Challenge: Discovery

Category: Junior

Region: South Slave

City: Fort Resolution, NT

School: Deninu School

Abstract: This project is about what shapes or types of bridges holds the most weight for bridges that are found within the Northwest Territories. This project has involved identifying bridge structures and discovering the most beneficial concepts of each bridge.

Biography

Hi, my names Starr MacLean and I'm a representative from Deninu School, in Fort Resolution, NWT. I enjoy staying home, hanging out with friends and playing on my phone. I got my inspiration for my project from my teacher and don't have any immediate plans for further investigations. For advice, I'd say do alot of research, find a topic that catches your attention and make your board creative.
