Jolie Jeddore

Colour Association

Challenge: Information

Category: Intermediate

Region: Mi'kma'q First Nation

City: Eskasoni, NS

School: Eskasoni High School

Abstract: In this project, I surveyed 82 people to see if all these colours and their moods can be seen by the average person. I also decided to check to see any differences in age and gender, seeing if there may be any of the other groups that can do better.

Biography

My name is Jolie Jeddore. I attend Allison Bernard Memorial High School. I enjoy participating in Air Cadets my hobbies include writing and drawing. I plan to become a graphic designer or an architect in the future I got my project idea from watching videos online. I heard that animators go into a lot of detail when it comes to all their colour choices and i wanted to see if the average person can really see all these moods and portrayals that come with them. I would like to see if the colours are extremely different in other cultures and other parts of the world. I heard that places in India have more negative associations in colours such as white. If i had to give advice, i would say to just find something that is interesting to you, and challenges you and the ideas of the world.
