Gender and the Stroop Effect

Challenge: Discovery

Category: Senior

Region: Sahtu

City: Fort Good Hope, NT

School: Chief T'Selehye School

Abstract: My project is called "Gender and the Stroop Effect". The Stroop Effect is a phenomenon where a series of words like "blue" or "green" are presented to people in different colours. People get confused because the word "blue" is in the colour yellow, for example. Most people enjoy the test to see if they will read the words correctly in spite of the colour.

Biography

One of my favourite hobbies are skiing and cooking, and I was on the high division team for Team NT for Arctic Winter Games. After I finish high school I plan on going to a university, I also have multiple colleges/universities I want to attend.
