Kylee Woodward

Memory ? Girls vs. Boys

Challenge: Information

Category: Junior

Region: Saskatchewan First Nations

City: Canoe Narrows, SK

School: Canoe Lake First Nation School

Abstract: My project is about finding gender differences in short term memory. it's a study to see if the female and male brain react differently using a picture with various items from the picture.

Biography

My name is Kylee Marcella-May Woodward, I live in Canoe Lake Cree nation, Saskatchewan. I enjoy doing science experiments and find great joy in it. I always loved finding out the many different ways the brain works and how it reacts to different things. My favorite type of science is life science. I am very grateful for this opportunity to show you my work and what I have learned. I enjoy sports such as, soccer, basketball, and especially hockey. I love reading books, meeting new people, and travelling. I was inspired to do this project from my last project with studying how the brain works. My next project would be the same study but to use symbols. I would encourage others to make projects geared toward Aboriginal culture and a topic they would like to learn about in any field of science.
