Kahley Iron

How Medications Affect Your Liver Cells

Challenge: Health

Category: Intermediate

Region: Saskatchewan First Nations

City: Canoe Narrows, SK

School: Canoe Lake First Nation School

Abstract: I studied how the medicines affect your liver cells and I developed this project through curiosity of what happens to the liver over time taking medicines. I found this interesting because I wanted to make others aware of what medicines do to your body. I wanted people to be aware of the damages to the liver by medicines.

Biography

Kahley Iron My name is Kahley Dae Iron. I am 14 years old. I am in grade 9 at Canoe Lake Miksiw School, Canoe Lake Cree First Nation, Saskatchewan. I enjoy sports such as, hockey, baseball, and badminton. I like doing productive things and keeping myself busy in school and working hard. My favorite subjects are, math and science (especially physical science). I love learning new things and meeting people. In the future, I want to be a scientist and find a cure for cancer and other illnesses.
