

CWSF 2018 - Ottawa, Ontario

Hayeon Min, Li Shu Yin Han

Vivre santé ou sans thé??

Challenge: Health

Category: Senior

Region: Montréal RM

City: Verdun, QC, Kirland, QC

School: Collège Saint-Louis

Abstract: Our project is a profound study on tea, from its creation to its chemical aspects to its health benefits. Our main goal is to convince the audience to drink more green tea!

Biographies

Hayeon - Hayeon Min is a Korean Montrealer, finishing high school with IB in Collège Saint-Louis. With a growing passion for arts and sciences, she decided to use her talents to help her surroundings. She joined the wall painting project at school through the Green Committee to raise awareness about the environment. She designed posters for several events held by her school or her church to raise funds for disadvantaged families locally and internationally. Being an immigrant herself, she enjoys tutoring young immigrants in French, mathematics and biology, so that they could adapt faster in their new school. This year, she gladly participated to the ...

Li Shu Yin - My name is Li Shu Yin Han and I am 17 years old, currently studying at Collège St-Louis in Montreal. My main hobbies are arts (movies, books, music and visual arts), baking, sewing. One of my career goals is to participate at least once to msf (doctors without borders). I got my inspiration for this project from my culture, as drinking tea is something we do daily. My physics teacher is also a fan of tea, and so we decided to search on the health benefits of tea.
