Dietary Fat: Friend or Foe?

Division: Life Sciences

Category: Junior

Region: Bluewater

City: Markdale, ON

School: Macphail Memorial E.S.

Abstract: This project studied dietary fats and cholesterol, and their relationship to health. These complex aspects of nutrition were investigated and simplified. Over three hundred food labels were analyzed which resulted in various suggestions including adopting a Mediterranean style diet. Heeding the rating system, developed in this project, will ensure proper dietary fat consumption, thus improving overall health, and dramatically reducing health care costs.
