#### A River Runs Through It - Phase 2

**Division:** Engineering & Computing Sciences

**Category:** Junior

**Region:** Edmonton

**City:** Edmonton, AB

**School:** Oliver School

**Abstract:** This project investigated water quality within the North Saskatchewan River at two different points ? near the headwaters and in proximity to a major urban centre. Results from the water samples were analyzed and compared to determine various ways humans affect water quality, as well as the water-dwelling organisms in it.
