Living with Wildfire

Challenge: Environment

Category: Junior

Region: Frontier Schools

City: Falcon Lake, MB

School: Falcon Beach School

Abstract: My project is about living with wildfire in the boreal forest. I wanted to do this project because i grew up in an area with a high risk of wildfires in the summer time. I have always wanted to learn about wildfires and how they are beneficial to our forests and to tell people that they do things to help our forests.

Biography

My inspiration for my project was because I live in a community where wildfire is a common occurrence every summer. I've personally been effected by two bigger wildfires, as scary as this was, it interested me. Both my parents have worked on fires which furthered my curiosity.
