School: Citadel High School

Abstract: Taking into account the massive global shortage of radiology services, and the fact that breast cancer is the single most common cancer that occurs in women, I developed DetectTimely; an open-source, standardized, and comprehensive BC analytics platform, which delivers A.I. powered clinical optimization to cultivate a new standard of pathological/radiological interpretation through an automated environment with prognostic-based outcomes at its forefront.

Biography

I'm just a fellow human trying to do good in the world. I don't know the key to success, but I do know the key to failure is obliging to what the world expects you to be.

Awards
