

# CWSF 2019 - Fredericton, New Brunswick

## Bridgit Bennett-Delorme

### CPR Model #2

**Challenge:** Health

**Category:** Intermediate

**Region:** Renfrew County

**City:** Pembroke, ON

**School:** Fellowes High School

**Abstract:** I have created a cost friendly CPR Model that is included with a visual of inside the human body that shows the performance of blood flow and air flow to the lungs when performing CPR. My research states that not one has been created which is why I felt the need to create mine so students have a better visual understanding of CPR.

### Biography

When I was in Fifth Grade, I was going through our class Health book where I discovered, there was no Visual Aid CPR Model created in the History of CPR models. This caught my attention very quick and I began to research further. I found information about failed CPR cases that shocked me and, I wanted to make a difference and hopefully bring the percentage rate of failed CPR cases go down more than half the reported percent. I encourage anyone to follow through with their ideas or challenges to improve the way we live, see and do things in today's World and the Future.

### Awards
