EPA Omega-3 Fatty Acid: Friend or Foe in the Battle Against Leukemia

Division: Life Sciences

Category: Junior

Region: Edmonton

City: Edmonton, AB

School: Edmonton Islamic School

Abstract: Leukemia is a cancer of the blood or the bone marrow. It is not a single disease and is treated by many costly approaches. However, the omega-3 fatty acid, eicosapentaenoic acid (EPA), is an innovative and cost effective alternative to treating leukemia. This method will make curing leukemia a reality.
