Nature's Disappearing Act: What are the Best Methods of Controlling Soil Erosion

Division: Engineering & Computing Sciences

Category: Junior

Region: Greater Vancouver

City: Burnaby, BC

School: Moscrop Secondary

Abstract: The goal of this project was to evaluate different methods of controlling soil erosion. The methods were vegetation, wattle fences, and brush layers in a cut (plus a control, which was a plain slope). Using rain and wind, natural conditions were recreated. At the end of the experiment the soil was weighed to calculate total soil erosion.

Awards	Value
Honourable Mention - Earth & Environmental Science - Junior	\$100
Sponsor: Petro-Canada	
Total	\$100
