

## CWSF 2019 - Fredericton, New Brunswick

## Biography

My name is Nattan Telmer. I'm a grade 11 student attending Mount Douglas Secondary School. Currently I am a competitive rower and spend a large portion of my time training. In the future I plan on entering an engineering school and becoming a material or chemical engineer. My inspiration for this years project came from my previous projects as they utilize the same devices. This experience allowed me to identify some problems which I could solve. I am very excited to continue my work and already have multiple ideas on what I can do to further improve Thermo-Electric Generators. I think that anyone who wants to work on a science fair project should start thinking about a concept long before the fair and write down all of their ideas because at least one of them will most likely be pretty good.

## **Nattan Telmer**

## A Flexible TEG Prototype (FlexiTEG) for Wearable Electronics

Challenge: Innovation		
Category:	Senior	
Region:	Vancouver Island	
City:	Victoria, BC	
School:	Mount Douglas Secondary	
Abstract:	The goal of this project is to engineer and test a prototype flexible	
	Thermo-Electric Generator that can power wearable electronics. A	
	Thermo-Electric Generator is a device that turns a heat difference into	
	electricity. The final product was able to power a standard analog or digital	
	watch and with improvements a smart watch as well.	

Awards	Value
Excellence Award - Senior - Bronze Medal	
Sponsor: Youth Science Canada	
University of Ottawa Entrance Scholarship	\$1 000
Senior Bronze Medallist - \$1000 Entrance Scholarship	
Sponsor: University of Ottawa	
Western University Scholarship	\$1 000
Bronze Medallist - \$1000 Entrance Scholarship	
Sponsor: Western University	
Total	\$2 000
