

## ESPC 2006 - Saguenay (Québec)

### Alexandra Milak

#### Smart Stuff 2-Multiple Intelligences & Human Cognition

**Division:** Sciences de la vie

**Catégorie:** Intermédiaire

**Région:** Simcoe County

**Ville:** Barrie, ON

**École:** Algonquin Ridge P.S.

**Sommaire:** This experiment examined the theory of Multiple Intelligences(MI) by administering both a self created IQ test and MI test to 140 elementary school students. Extensive statistical analyses were conducted, which determined the reliability and validity of both tests. The results from this novel experimentation proved to be helpful in determining the future effects of this theory in IQ testing and the educational system.

Prix	Valeur
Prix de La Fondation actuarielle du Canada - Intermédiaire	750.00 \$
Total	750.00 \$
