The Bermuda Triangle

Division: Engineering & Computing Sciences

Category: Intermediate

Region: Saskatoon

City: Saskatoon, SK

School: Walter Murray Collegiate

Abstract: This project was designed to separate fact from fiction in regards to the Bermuda Triangle. I decided to do three experiments and two research projects. The topics I covered ranged from methane bubbles to rogue waves to magnetic interference. Four myths proved to be truthful; however these events could happen anywhere. After doing this project I learned that the Bermuda Triangle is just media hype.
