## The Indestructible Home: 2006

Division: Category:	Health Sciences Intermediate
Region:	Northwest Saskatchewan
City:	Unity, SK
School:	Unity Composite H.S.
Abstract:	My project is The Indestructible Home:2006, built to withstand almost any natural disaster. It combines various construction methods, design concepts, and some radical ideas in order to endure the forces of nature. Overall, I found these ideas to be very successful, though they were hard to illustrate in a model.
