The Indestructible Home: 2006

Division: Health Sciences **Category:** Intermediate

Region: Northwest Saskatchewan

City: Unity, SK

School: Unity Composite H.S.

Abstract: My project is The Indestructible Home:2006, built to withstand almost any

natural disaster. It combines various construction methods, design concepts, and some radical ideas in order to endure the forces of nature. Overall, I found these ideas to be very successful, though they were hard to

illustrate in a model.
