Vegipaper

Division: Engineering & Computing Sciences

Category: Junior

Region: York

City: Richmond Hill, ON

School: Beverley Acres P.S.

Abstract: Our life is very much dependant on paper. However our forests can't keep up with these demands. So I created the world's first vegipaper. It is totally natural, biodegradable, toxin free and environmental friendly paper. My paper can be made by using any vegetable high in fibre and cellulose.
