Lefty Prodigy? : Are left- handers more creative and intelligent than right- handers.

Division: Life Sciences

Category: Junior

Region: Toronto

City: Toronto, ON

School: David Lewis P.S.

Abstract: "Lefty Prodigy" puts the theory that left-handers are more creative, to the test. I hypothesized that left-handers are more creative and more intelligent than right-handers. I tested this using a unique assessment. It was designed to test the participants' intelligence and creative thinking. The data collected supported the original hypothesis.
