Making Fast Food Healthy

Division: Sciences de la vie

Catégorie: Junior

Région: Peterborough

Ville: Peterborough, ON

École: Lakefield College School

Sommaire: This experiment explored how healthy side dishes were from a popular fast food restaurant. The five side dishes tested were: fries, chicken Caesar salad, garden salad, chilli, and baked potato. These side dishes were tested to find starch, sugar, protein, and lipid content. Which side dish was the healthiest was considered and reported.
