Code 3 for the Diabetic Emergency

Division: Life SciencesCategory: IntermediateRegion: Cariboo MainlineCity: 150 Mile House, BC

School: Williams Lake Secondary School

Abstract: I studied diabetes and the pre-hospital emergency care that can be

provided to diabetics. I examined the protocols for four levels of paramedics. Diabetes results when the body doesn't produce insulin or can't use the insulin produced. Higher training results in more care

paramedics can provide for diabetic patients.
