Save a Watt, Save a Lot!

Division: Engineering & Computing Sciences

Category: Intermediate

Region: New Brunswick

City: Bathurst, NB

School: Bathurst High School

Abstract: The goal of this project was to put a monetary value on electricity consumption around the house so that the average consumer could see where to change usage habits or replace old appliances and/or lighting. We wanted to be able to see where the most energy was being used and where it could be easily saved.
