

## CWSF 2005 - Vancouver, British Columbia

### Chris Zylik

#### The Green Machine

**Division:** Engineering & Computing Sciences

**Category:** Junior

**Region:** Bay Area

**City:** Oakville, ON

**School:** Oakville Christian School

**Abstract:** Even with the introduction of hybrid and fuel cell technology, the idea of fuel-combusting vehicles has not evolved. Harnessing the wind to generate propulsion could and should be an alternative. Developing and building a wind powered car demonstrates the potential of wind energy to generate electricity for propulsion.

Awards	Value
Honourable Mention - Automotive - Junior Sponsor: AUTO21	\$100
Total	\$100
