What's the Spatter?

Division: International

Category: Junior

Region: Bluewater

City: Hanover, ON

School: Holy Family E.S.

Abstract: This project compared water to sheep blood in blood spatter experiments. One hundred and four spatters using various combinations of water and sheep blood were examined, and strung using the formula that traces blood spatter back to its area of origin. Multiple spatters were done for each combination. It was concluded that water accurately simulates sheep blood in blood spatter experiments.

Awards	Value
The University of Western Ontario Scholarship Gold Medallist - \$2000 Entrance Scholarship Sponsor: University of Western Ontario	\$2 000
Gold Medal - Physical & Mathematical Sciences - Junior Sponsor: Encana Corporation	\$1 500
Total	\$3 500
