

ESPC 2006 - Saguenay (Québec)

Denise Meeches, Chantel Vivier

Smart Shelter

Division: Sciences de la santé

Catégorie: Junior

Région: Manitoba First Nations

Ville: Portage la prairie, MB, Edwin, MB

École: Long Plain School

Sommaire: In this project we experimented with the ability of different materials to absorb and store heat from the sun. We also looked at traditional First Nations building materials used in the earth lodge. We used the results of our study and the knowledge gained to design an energy efficient home for a local site.

Prix	Valeur
Prix Innovation Petro-Canada décernés par les pairs - Junior Centre du Canada Commanditaire: Pétro-Canada	200,00 \$
