Derek Ball

Fertilizing Growth

Division: Physical & Mathematical Sciences / None

Category: Junior

Region: Carlton Trail

City: Holdfast, SK

School: Schell School

Abstract: In this project I did an experiment to see how fertilizer affected plant growth. I planted three types of plants. I planted them in 18 pots. Then over the next two months I added a measured amount of fertilizer to each pot. Then I measured the roots and the height of the plants to see my results.

Biography

Hi, my name is Derek Ball and I live in Holdfast Saskatchewan. I am 14 years old and I did the project Fertilizing Growth. I live on a farm where we grow many crops and we also raise cattle. During school I play volleyball and badminton. My favorite classes are gym and info. During the summer I take swimming lessons at the lake. My hobbies and interests are riding my bike, playing games, playing my friends at chess and taking care of animals. In my future I would like to be a veterinarian.
