Abstract: My project is a research, survey, experiment and program, used to determine whether or not iPods damage your hearing, and if enough people do damage it to cause a problem. When I found that it is, I wrote a program that automatically displays the volume, and how long you can listen to it at that level. Then it warns you to turn down the volume.

Biography

I play competitive soccer in my community, and I'm on the volleyball and badminton team at my school. I won first place last year in my category at my regional fair, and a special award. I also won a trip to the Canada-Wide Science Fair, where I placed 3 in Engineering. This year also came in first for my deivision, but I also won 2nd over-all and 2 special awards. After high school I plan on attending University.
