The Dig on Logs

Division: Health Sciences / None

Category: Junior

Region: Chignecto Central West

City: Truro, NS

School: Bible Hill Junior High School

Abstract: My project is about the efficiency of digger logs during low water flows. Water may not always be able to flow at a constant rate over an original digger log. I created two types - a v notched and square notched digger log that allowed a constant flow to help create larger pools for fish habitat during low water flows.

Biography

I'm a grade eight student at Bible Hill Junior High School. I love badminton, track and field and trampoline. I love to read and hang out with my friends on weekends. I've won awards for trampoline, track and field and regional science fair. I plan to attend university and become an interior designer or clothing designer. During the summer my favorite activities are dirtbiking, hiking in the woods, and spending time on the beach. I love to travel and experience new things or see new places. My favorite foods are tacos, pasta and ice cream.
