Big Lungs? Big People?

Division: Physical & Mathematical Sciences / None

Category: Junior

Region: Annapolis Valley

City: Windsor, NS

School: King's-Edgehill School

Abstract: Durring Basketball season I became interested in performance and fitness. I wondered why some players can perform better and more efficiently. My first idea was height but I knew that didn't make sense. Just because you are tall will not make you a good basketball player. So I tested my teams Lung capacity. My results that came back proved my hypothesis. Big People, Big Lungs.

Biography

I am in grade 8 at King's-Edgehill School in Windsor, NS. I like to play sports especially basketball, soccer and rugby. I also am on the track team. I don't really know what I would like to do for a job yet but I'm only 14 so its not that big of a deal yet. I'm very interested in computers and would possible enjoy working with them. I am from Lunenburg NS but I live at my school in Windsor.
