Solar Cooking

Division: International / None

Category: Junior

Region: Peace Country

City: Spirit River, AB

School: Spirit River Regional Academy

Abstract: For my project I built two solar cookers. I studied the electromagnetic spectrum and how light can be turned in to heat energy. I was interested on solar cooking because its renewable energy and helps the environment.

Biography

I am a Grade 8 student at Spirit River Regional Academy. I'm top of my class with marks in the high 80's. I am also involved in every extra curricular sport activity. While I'm concentrating on my present school work my future goals are to either become a lawyer or power engineer. I am a dedicated sports fan to the Toronto Maple Leafs and the Phoenix Suns. I also play golf, basketball (hoping to play collage ball one day), volleyball, track, soccer and badminton. Out of all my achievements my favorites are winning the Rainbow Lake Junior Golf tournament, playing soccer at the Alberta Summer Games and qualifying to go to the Canadian National Science Fair. I am very excited to be going to Nova Scotia and represent Alberta's Peace Country.
