Carly Redford

Methropolis: The Youth Epidemic

Division: Life Sciences / None
Category: Junior
Region: Cariboo Mainline
City: Lac la Hache, BC
School: 100 Mile House Jr Secondary
Abstract: My name is Carly Redford and I attend 100 Mile Junior Secondary School. I am in grade 8 and I was born June 11th 1993. I have chosen to conduct an experiment to discover what Crystal Meth ingredients could do to muscle and organ tissue, as well as to the body in general.

Biography

Hello, my name is Carly, and I'm a chatterbox. I tend to talk for unusually long periods of time, whether I am talking to my friends, the media, or someone new, my life is a constant conversation. When community events happen I do try to help out. I have helped out with two event dinners, several school fundraisers, Destination Imagination, Relay for Life, Thunder Mountain Speedway. I haven't participated in many school events this year, but at the moment I am attending a writing workshop and festival of the arts. My main interests/hobbies are outdoor activities, just hanging out with my friends, listening to music, history of arts/musical theory/first scientific discoveries, comedy, and traveling. My career plans are two opposite topics. I am very interested in the musical arts field. I find it a creative way to express myself, in a way that other people can relate to. My other choice would be a career in the chemistry field. I like chemistry because it is an awesome way to experiment with different liquids and such. Well I hope you look forward to seeing me, Carly
