School: Bathurst High School

Abstract: My project was to determine the relationship between aggression and video games. This is an issue that has been creating a lot of havoc, there was even a law created restricting anyone under the age of 18 to buy games rated M for mature. I tested 7 teenage boys with two games, rated E for everyone and T for teen. The results were very suprising.

Biography

i have been involved in drama for two years now, one year at superior middle school and one year at bathurst high school. during the summer i volunteer at the hospitality days festival, this summer will be my sixth year. my hobbies include video games, reading, playing guitar, acting, and making little animated cartoons on powerpoint. i have a grade 9 education, i have recieved straight "A's" this entire year. i recieved student of the month twice in middle school and was on the honor roll in grade 8.
