School: Kugaardjuk Ilihakvik

Abstract: We use our senses to learn about lots of things in our environment. I want to investigate how our different senses work together to tell us information about our environment.

Biography

Hi my name is Miranda! I live in Kugaaruk Nunavut. It is really fun living in the the arctic because we walk around all night because it never gets dark in the summer. In winter we go sliding and ski-doo riding . I love playing dodgeball and fireball. I played soccer in Kugluktuk in Novmber. I love visiting other places and I am excited to visit Winnipeg. In the future I might like to be an RCMP officer because they get to live in lots of different places.
