Abstract: Designing a night-time lighting solution for urban cities presents a great challenge for city planners as the light pollution has become an issue since 2000. Over-illumination causes lots of energy waste and is found to release CO2 gas. To solve this issue, I suggest a new design of street lamp as a solution.

Biography

I like doing a jobs that is involved in computers and enjoy learning new things. I like doing making things and like to see how the things work or find a new fact.
