Scratch-Off Cards: Are You Being Manipulated to Lose?

Division: Physical & Mathematical Sciences / None

Category: Intermediate

Region: London District

City: London, ON

School: Central S.S.

Abstract: I want to determine what affect graphic design elements might have on an individual's attention and response. I want to test this by using a real example-I.e., how they might play a scratch-off card. Specifically, I want to determine if changing the colours and artwork on a scratch-off card will influence the spot a player scratches

Biography

I am a grade 10 student at Central Secondary School in London, Ontario. I have lived in both London, Ontario, Canada and Baltimore, Maryland, USA. My hobbies include curling and playing chess. My favorite subjects in school are Math and Science.
