#### Matoo: We've Got You Covered

**Division:** Physical & Mathematical Sciences

**Category:** Junior

**Region:** Kivalliq

**City:** Baker Lake, NU

**School:** Jonah Amitnaaq School

**Abstract:** We wanted to determine which material would make the most efficient ice fishing hole cover. The materials we tested were: caribou skin, plywood, fiberglass insulation, loose snow, and snow blocks. We tested each cover four times. After we tabulated the data we concluded that fiberglass works the most efficiently.
