Aerodynamics of Transport Trucks II

Division: Biotechnology

Category: Junior

Region: Yukon Stikine

City: Whitehorse, YT

School: Vanier Catholic Secondary

Abstract: To design, construct and test a custom truck body design based on a current truck chassis that is more aerodynamic than a current truck design, even with drag reducing modifications. Then show through calculations how much fuel, money and CO2 emissions could be saved from a reduction in drag.

Biography

My name is Nick Hayden. I am thirteen years old and a 1st degree Black Belt in Shotokan Karate. I also train with the sword, sai and bo staff. I like basketball, football, badminton, and tennis. I am a decent swimmer and I like to draw. My favourite subjects in school are gym, science and socials. I like ancient Romans and Greeks, especially the Gladiators and Spartans. I like Greek myths and know a lot about them.
