

# CWSF 2010 - Peterborough, Ontario

## Collin Fair

### Enhancing Educational Resource Accessibility

**Division:** Engineering & Computing Sciences

**Category:** Intermediate

**Region:** Central Alberta

**City:** Carstairs, AB

**School:** Olds Junior Senior High School

**Abstract:** This project is an attempt to streamline the process of finding educational resources. Online there are many free, relevant and high-quality resources for almost every subject, but teachers may not have the resources to find them. Educators were surveyed at multiple points in the process to ensure the end solution would be aligned with the actual problems educators face when finding resources to teach with.

#### Biography

When I'm not going to science fairs I'm probably making cool uses for publicly available data, helping groups with lighting & sound at a local theatre, taking photos, or on a trip to Baffin Island.

#### Awards

#### Value
