Owen Zheng

Nutritious Rice Water

Division: Earth & Environmental Sciences

Category: Junior

Region: Toronto

City: Toronto, ON

School: Terry Fox P.S.

Abstract: The purpose of my experiment was to find out whether rice water makes plants grow taller. I grew my plants and I watered them equally half with rice water and the other half with water. According to the results, plants watered with rice water are taller. In conclusion, rice water is more nutritious than water and rice water does make plants grow taller.

Biography

My name is Owen Zheng and I am 14 years old. I am positive, dynamic and competitive. I'm very interested in mathematics and science. I like automobile engineering and Albert Einstein's "Theory of reality". I love to read variety kinds of books and play sports. My hobbies are listen to music and play basketball.
