#### Lose a Tonne: It's Easy!

**Division:** Earth & Environmental Sciences

**Category:** Intermediate

**Region:** Cariboo Mainline

**City:** 150 Mile House, BC

**School:** Williams Lake Secondary

**Abstract:** My study focused on the One Tonne Challenge. I completed the questionnaire according to what would be closest to an average household. I then did the reductions and compared each change with the starting emissions in graphs. I also looked into the background of the questions and any assumptions that were made.
