We've got Chemistry: Aphrodisiacs, Pheromones and Attraction

Challenge: Health

Category: Senior

Region: Toronto

City: Whitby, ON

School: Notre Dame C.S.S.

Abstract: Is "chemistry" between people pheromones affecting our brain? Aphrodisiac foods were consumed determining if diet adjustments alter female's pheromones affect on males. Males smelt shirts, matching scents to photographs (using divine proportions to gauge attractiveness) from 28 females, associating appealing, sweeter scents to females with features more closely aligning with the divine proportion and sweatier aroma's to females with features that were less aligned.

Biography

I'm a grade 12 student at Notre Dame High School with a passion for biology and creative writing. I want to study at the University of Western Ontario next year?! hope to work towards a degree in medical sciences and I aspire to be a dermatologist. I have won academic awards in English, Biology and P.E. as well as athletic awards like MVP in volleyball and track. My favourite place to be in the world is the beach. I am excited to travel; I've been to Holland, Dominican Republic, Cuba, New York, and Jamaica (to name a few places). I plan on seeing London, Paris, Greece, Italy, Egypt, South America and anywhere else I can go. I love sports and have been playing competitive and recreational volleyball for eight years (I've been captain on my high school team twice). I currently am the president of Notre Dame's Athletic Council, which entails organizing activities, relaying information to parents and students and raising school spirit. I enjoy reading, writing, travelling, listening to music, playing sports (soccer, volleyball, ultimate Frisbee, badminton... the list goes on), baking, spending time with friends, designing, watching movies and asking question.
