

CWSF 2011 - Toronto, Ontario

Owen Hogg

Etes-vous plus creatif qu'un deuxieme annee?

Challenge: Discovery

Category: Junior

Region: Timmins

City: Latchford, ON

School: École St-Michel

Abstract: This experiment measured divergent thinking (which is one component of creativity) using Guilford's multiple uses test, and compared scores from grades two to eight. The summation score as described by Runco (the sum of the fluidity, originality and flexibility scores) was employed. It showed that as the level of education increased, the scores decreased.

Biography

I am a grade 8 student from a small town in Northern Ontario. At school I am involved in many sports teams. My passion is anything to do with my favorite sport, soccer, which I have been playing for 8 years. I also enjoy snowboarding. I come from an English speaking family and go to a French school. This has given me a wider perspective on many issues, and as well allowed me to become bilingual. I am considering a future career in psychology.
