Helping the Grain Industry: Developing a RT-PCR based purity test for Durum

Challenge: Innovation

Category: Senior

Region:

City: ,

School:

Abstract: Purity is a crucial component of the seed grading system; purity determines a crop's value. The total number of 25 Canadian west durum varieties adds great difficulty to the conventional approach to seed purity determination. The current methodology to determine the purity, protein analysis, is labour intensive and time consuming. In this project, a real-time polymerase chain reaction (RT-PCR) was explored as an alternative method.

| Awards | Value |
|---|-----------------|
| The Canadian Society for the Weizmann Institute of Science Scholarships Joseph W. and Joel Anthony Leon Kerbel Scholarship Sponsor: The Canadian Society for the Weizmann Institute of Science (Weizmann Canada) | \$9 400 |
| Excellence Award - Senior - Silver Medal Sponsor: Youth Science Canada | \$700 |
| Dalhousie University Faculty of Science Entrance Scholarship Senior Silver Medallist - \$2500 Entrance Scholarship Sponsor: Dalhousie University, Faculty of Science | \$2 500 |
| UBC Science (Vancouver) Entrance Award Senior Silver Medallist - \$2000 Entrance Scholarship Sponsor: The University of British Columbia (Vancouver) | \$2 000 |
| University of Ottawa Entrance Scholarship Senior Silver Medallist - \$2000 Entrance Scholarship Sponsor: University of Ottawa | \$2 000 |
| Western University Scholarship Silver Medallist - \$2000 Entrance Scholarship Sponsor: Western University | \$2 000 |
| Total | \$18 600 |
