#### Julia and The Magic Nitrogen Beans

**Division:** Life Sciences

**Category:** Junior

**Region:** Bay Area

**City:** Burlington, ON

**School:** Appleby College

**Abstract:** The purpose of this experiment was to determine the effects of nitrogen on bean plants. Eighteen bean plants were grown from seed. These plants were given different amounts of nitrogen every 2 days. Over the course of 16 days, the results showed that nitrogen had both a good and bad effect on bean plants.
